

PRODUCT DATA SHEET: VG52SD & VG70SD GYROSTABILIZERS

VG52SD / VG70SD

Angular Momentum	52 / 70 kN.m.s
Rated Stabilizing Torque	120 / 145 kN.m
Mass	2575kg (5680lb) / 2850kg (6283lb)
Power	11 – 16 ekW
Rated RPM	4800
Cooling Water	30 – 75 lpm
Running Noise	Average 65 dBA

Note: Dimensions below exclude clearances. For more information, please ask VEEM Marine for a Product Installation Drawing

VEEM Marine's small frame size gyrostabilizers offering compact stabilizing power in a single unit installation for vessels ranging from **65' – 120' (approx. 20 – 37m)**

VEEM MARINE ADVANTAGES INCLUDE

- Up to 95% roll reduction at rest or underway
- Fully maintainable in the vessel (inc. major overhauls)
- Highest stabilizing power per \$ or kg/lb available
- Recirculating forced lubrication for long bearing life
- Epoxy coatings and corrosion resistant components
- Low noise emissions
- Telemetry for remote monitoring, diagnostics & updates
